5. Mysoftheaven (BD) Ltd Expertise

Mysoftheaven (BD) Ltd professionals are skilled in various technologies. The following is a shortened list of the technologies more widely used:

Design Methodologies	UML, SSADM 4. M
Development Tools	Visual Studio, Developer X.X .
RDBMS	Oracle, MS SQL Server, DB2, My SQL.
Web Servers	Domino Server, Microsoft IIS, Apache Web Server, Web Sphere, Tomcat, Web logic.
Web Development Tools	Visual Studio.NET, C#.Net, VB.NET, ASP.NET, ASP, PHP, XML, PERL, CGI, Java, JSP, EJB, WAP, WML, WML Script, HTML, DHTML, Java Script, VBScript, CSS, Ajax.
Distributed Computing	CORBA, COM, DCOM.
Operating System	Windows 9x/NT/200X, Linux, OS/400, SCO Unix, Linux
Languages	Java, C, C++, RPG, C#, Visual Basic, PHP
Document Management	Lotus Notes & Domino Server.
Other Tools	Dream Weaver, Visual Interdev, Cold Fusion, Microsoft Front page Express
Multimedia	Macromedia Director, Macromedia Flash, Macromedia Author Ware, Adobe Premiere, 3D Studio Max.

Mysoftheaven (BD) Ltd

15/10, Block #C, 3rd Floor, Tajmahal Road, Mohammadpur, Dhaka-1207
 Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

6. Areas of expertise:

01.	B2B and B2C Internet/Intranet Applications
02.	ERP solutions for small , medium and Large scale Industries
03.	Human Resource Management System
04.	CRM / Sales and Distribution System
05.	PDA based systems
06.	Mobile based systems
07.	Electronic Fund Transfer System
08.	Dynamic Report Designer
09.	Financial Accounting Package
10.	Branch Banking Solutions
11.	Inventory Control System
12.	Process Automation System
13.	Production Control System
14.	MIS of various types
15.	Decision Support Systems
16.	Banking Core Systems.
17.	Iphone Application.
18.	Mobile Application.
19.	Network Troubleshooting.
20.	Call Center.
21.	Web Application .
22.	Website Development.
22.	Graphics Designing.
23.	Data Entry +Data Processing.
24.	Search Engine Optimization.
25.	Software Maintenance.

Mysoftheaven (BD) Ltd

15/10,Block #C, 3rd Floor, Tajmahal Road, Mohammadpur, Dhaka-1207
 Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

7. Software Resource

Windows XP, LINUX Operating System

Windows NT

Windows 98/2000

Oracle8 RDBMS with Developer/2000 & Designer/2000 , Office 97 Suite

Developer Studio (Visual Basic 6, Visual C++, Visual J++ and Visual FoxPro 5)

(All other popular Software for assisting Corporate Training)

8. Mysoftheaven (BD) Ltd Technical Team Structure:

9.0 Scope of Work:

9.1 Client

Diabetics Hospital Lalmonirhat., Bangladesh

9.2 Business Overview

Diabetics Hospital Lalmonirhat. Is a Hospital and diagnostic centre . They wish to automate Full ERP system of overall management is improved.

9.3 Business Flow

Diabetics Hospital Lalmonirhat. ERP software Development..

9.4 Overview of the Proposed System

The purpose of the proposed system is to manage and automate the Full systems of **Diabetics Hospital Lalmonirhat.** using A complete Enterprise Resource Planning (ERP) System

9.5 Risk Management

Schedule Risk: The schedule is very tight and resource is limited so there are chances to miss the deadlines. To minimize the Schedule Risk and to achieve the dead line of the project the Team Leader and the project Manager will monitor the progress of jobs very closely and if needed additional resource will be engaged.

Human Risk: As the project is very tightly scheduled leaving of any team member will result on missing deadlines. If new team member is engaged it will not be possible to train him/her so quickly. To overcome this risk, team members should be encouraged to share their tasks with other members in weekly session. Design and codes should be documented properly.

Domain Knowledge Risk: The domain of this software is basically in client side so there is a risk of communication gap in gathering domain knowledge. To overcome this risk detail requirement documentation should asked from client side. Weekly meeting, teleconference, mail will be arranged. Regular email communication should be continued and without an active participation of SCB IT in laying out the “BDDDB Dumb “ text file and mapping of the database with field would be a serious project risk.

Mysoftheaven (BD) Ltd

15/10,Block #C, 3rd Floor, Tajmahal Road, Mohammadpur, Dhaka-1207
Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

9.6 Change Control

The Project Manager will be responsible for maintaining 'Project File', Approving Changes and Monitoring overall activities of the software. Business Analyst will be responsible to control business requirements, Team leader will be responsible to control the source and PM will be responsible to monitor change request status & will maintain following documents

- CR(Change Request) Form
- RTM (Requirement Traceability Matrix)
- Complexity Based Estimation

9.7 Requirements Management

Requirements form the basis of project planning and management and all the activities performed in a software project. For successful project execution, it is necessary to ensure that the requirements are managed effectively and that all project activities are based on agreed and signed - off requirements.

The Requirements Management process ensures that proposals and contracts are based on gathered and approved requirements and that these requirements form the basis for all planning and execution activities of the project. It establishes the Requirements Traceability Matrix with bi - directional traceability with the initial requirements and defines the Project RM Plan. The Requirements Management process uses this Project RM Plan, along with the Software Engineering Lifecycle process and the Project's Process, to manage requirements and maintain bi directional traceability throughout project execution.

9.8 Review Process

The purposes of the work are:

- Product reviews is to ensure that work
- products/ outputs of various processes in software projects meet the specifications and relevant standards. For example:
 - Project Proposals
 - Project Management Plans and other project planning documents
- Risk Management Plan
 - o Project CM (Configuration Management) Plan
 - o Project MAA (Measurement and Analysis) Plan

9.9 Risk Management

Schedule Risk: The schedule is very tight and resource is limited so there are chances to miss the deadlines. To minimize the Schedule Risk and to achieve the dead line of the project the Team Leader and the project Manager will monitor the progress of jobs very closely and if needed additional resource will be engaged.

Human Risk: As the project is very tightly scheduled leaving of any team member will result on missing deadlines. If new team member is engaged it will not be possible to train him/her so quickly. To overcome this risk, team members should be encouraged to share their tasks with other members in weekly session. Design and codes should be documented properly.

Domain Knowledge Risk: The domain of this software is basically in client side so there is a risk of communication gap in gathering domain knowledge. To overcome this risk detail requirement documentation should asked from client side. Weekly meeting, teleconference, mail will be arranged. Regular email communication should be continued and without an active participation of SCB IT in laying out the “BDDDB Dumb “ text file and mapping of the database with field would be a serious project risk.

Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

9.10 Change Control

The Project Manager will be responsible for maintaining 'Project File', Approving Changes and Monitoring overall activities of the software. Business Analyst will be responsible to control business requirements, Team leader will be responsible to control the source and PM will be responsible to monitor change request status & will maintain following documents

- CR(Change Request) Form
- RTM (Requirement Traceability Matrix)
- Complexity Based Estimation

9.11 Quality Assurance

Serial No	MSL Quality Policy Statements	Reference
01	A SQA shall be assigned to every project at the start of the project. SQA shall not have a direct reporting relationship to the Project Manager or the Group Manager of the project in which he/she is the assigned SQA. For Project QA activities, the SQA shall report to the SQAM/ QAM.	Project Initiation Note
02	A Project QA Plan shall be prepared and used to objectively evaluate work products and processes of projects.	SQA Plan & Tracker
03	Results of the evaluation shall be reported to relevant stakeholders and escalated as required.	SQA Plan & Tracker
04	Actions to resolve the identified issues shall be tracked to closure.	SQA Plan & Tracker

9.12 Standards

The purpose of Quality Assurance is to provide an objective evaluation of processes and work - products of software projects. A Software Quality Analyst (SQA) who is independent of the project carries out the Quality Assurance activities for a project. The SQA provides Chief Operation Officer (COO) with appropriate visibility into and feedback on the processes and work products of projects.

9.13 Responsibilities:

Phase	Responsibility
Planning& Documentation	Project Manager, Domain Expert, Technical Lead, Software platform Architect, Network consultant, Story board writer, Developers, Technical Writer, Trainee
Requirement Analysis	Project Manager, Domain Expert, Technical Lead, Requirement Analysis Software platform Architect, Network consultant, Client rep
Requirement review	Project Manager, Domain Expert, Technical Lead, Requirement review Software platform Architect, Network consultant, Story board writer, Developers, Client rep
Making all Policies	Making all Policies Project Manager, Domain Expert, Technical Lead, Client rep.
Design	Project Manager, Domain Expert, Technical Lead, Design Software platform Architect, Network consultant, Story board writer, Developers, Client rep
Development	Development Domain Expert, Technical Lead, Developer, Animation artist, Graphic Designer, Client rep
Prepare Test case	Project Manager, QA Manager, Client rep
Testing	Testing Project Manager, QA, Manager, Tester, Domain Expert from Client reply.

			reviewed. Applicable external reviews and sign-offs are completed.
--	--	--	---

Perform Installation and Acceptance			
Inputs	1. System/ sub system tested code 2. User and Operations Manual 3. User Acceptance Test Plan	Entry Criteria	1. System/ sub system testing is completed and reviewed 2. User Acceptance Test Plan is available 3. Installation and Changeover Manual is available
Outputs	Completion letter from client	Exit Criteria	System goes 'live' or a decision is taken to scrap the system

10.6 Project Execution Plan

- **Project Management Structure**
- **Project Roles and Responsibilities**

Role	Responsibility
PM	PM is responsible for monitoring and executing the total project activities. He is also responsible for communicating with the client & stake holder and creating further business Development opportunity for this product.

Mysoftheaven (BD) Ltd

15/10,Block #C, 3rd Floor, Tajmahal Road, Mohammadpur, Dhaka-1207
Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

	<p>In the organization or outside of the organization, he is responsible for communicating with Clients, Accounts, Human Resource (HR) and Marketing department as per required.</p> <p>PM is also accountable for ensuring the stability of customer satisfaction. He will monitor the change request of clients and release the updated product version in each</p> <p>Milestone basis as per frequency defined in PMP. And he will circulate the product release report to relevant all stake holders. PM must follow the all organizational process to monitor the project. Monthly status report prepare & submit to the relevant stakeholder is PM's one of the prime responsibilities.</p>
CC	<p>CC will maintain the configuration items in the project. He is responsible for change control management of documents, set up access rights and maintaining VSS in the project. He must follow the organizational CM process to control the CM activity in to the project.</p>
Requirement Analyst	<p>Requirement Analyst is responsible for collecting requirement, analysed & document the requirement in BRD & SRS. In this project he will collect requirement from Change</p>

Mysoftheaven (BD) Ltd

15/10,Block #C, 3rd Floor, Tajmahal Road, Mohammadpur, Dhaka-1207
 Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

	Request tracking register. He will also help to analyse the change request from client.
Architect : Technical Team Leader	Technical team leader will responsible for all engineering activities. He will train all engineering resource on relevant technology. Technical team leads also provide all kind of necessary technical support, service, and product overview and hands-on training to the client. He will also maintain the support call maintenance record.
Developer	Developer is responsible for developing the source code, writing database script and unit test. He will also document the each unit of the product
SQA	SQA is responsible for ensuring the product maintenance process quality and work products quality. SQA is provide the necessary facilitation for all kind of quality activities as per defined in organizational quality process and this plan. SQA will assist PM to prepare the product management plan.
Tester	QC is performing the test of any newly developed component, feature and look after the change impact & stability of the product.
Graphics Design	Graphics designer is responsible for attractive graphical looking & user interface of existing & newly developed component.

11.0 Manpower Selection:

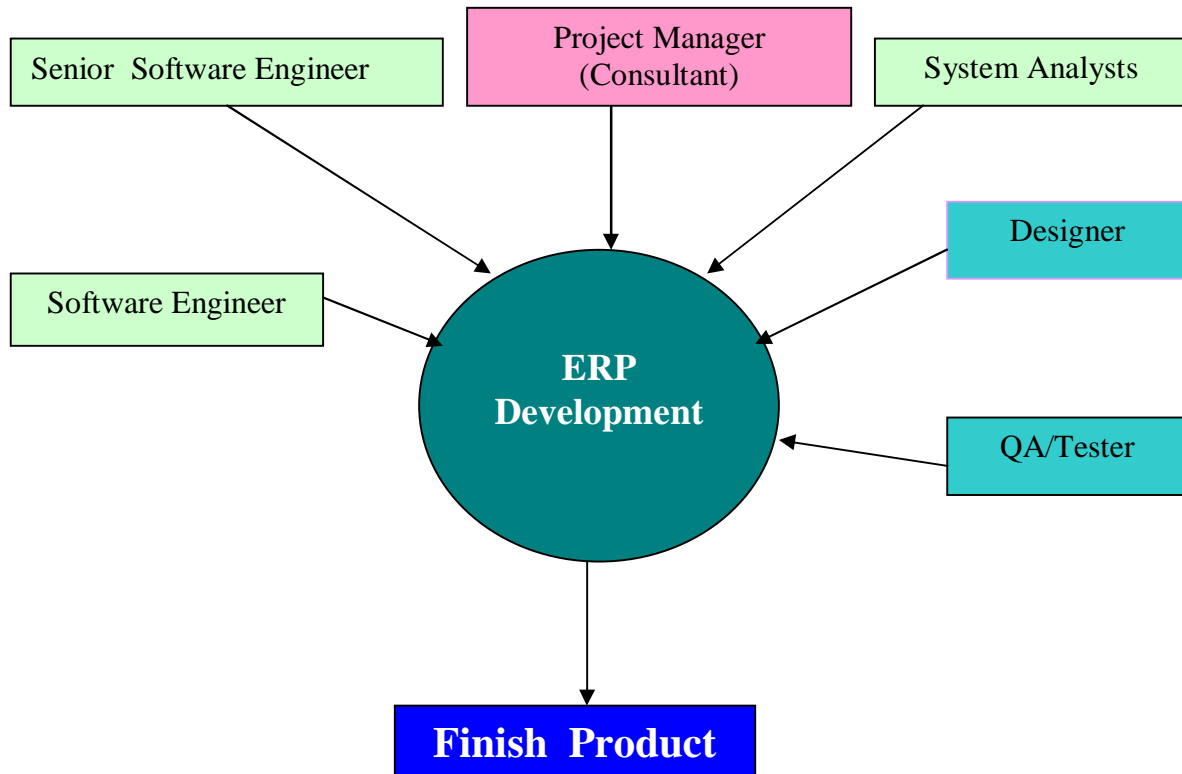

Figure : Overall Project Manpower Diagram.

11.1 Estimate Pricing:

Service Item	Estimated Cost
Enterprise resource planning (ERP) module 1. Hospital & Diagnostic centre Management system. 2. Inventory management system. 3. Accounts management system 4. Attendance Management systems 5. Human resource management system The Module may be named as per client demand and requirement.	5,50,000.00
Fife lac fifty thousand Taka only	5,50,000.00

11.2 Maintenance charge:

Service Item	Cost (Yearly)
15% of total Project value	15% of total

11.3 Estimate time:

Time	Working months
Competition of the project	Minimum 4-5 Months

11.4 Pricing Schedule:

The above pricing is effective through {start Date}. 35% of total project fee is due upon contract acceptance with remainder due upon as per project completion.

Mysoftheaven (BD) Ltd

15/10,Block #C, 3rd Floor, Tajmahal Road, Mohammadpur, Dhaka-1207
 Web : www.mysoftheaven.net, Email : info@mysoftheaven.net

11.5 Next Steps:

To proceed with this project, **Diabetics Hospital Lalmonirhat**. is required take the following steps:

1. Accept the proposal as is or discuss desired requirement.
2. Finalize and sign contract.
3. Submit initial payment of 35% of total project fee.
4. Remaining payment will be made as per competition of each module.

Once these steps have been completed we will begin the project with a kick off meeting to introduce relevant personnel and begin preliminary project activities.

We will be waiting for your reply and hope we can meet soon and finalize the terms. Please feel free to let us know if you have any question. / query.
